

Genome-wide gene divergence ranking from rectified_h

All 15,038 scorable genes

Score distribution

NEFM rank=66
score=0.160

NEFL rank=93
score=0.077

Ranking uses $\text{gene_divergence_score} = 0.4 \times \text{median_difference_structure_score} + 0.35 \times \text{divergent_fraction_top10pct} + 0.25 \times \text{top3_mean_difference_structure_score}$. Only genes with at least 5 retained enhancers are ranked. NEFM and NEFL are highlighted.
