

lamb1a weMERFISH locus + spatial raw/latent view

lamb1a locus and significant enhancers

Window = ±100,000 bp around *lamb1a* TSS; exclude any TSS ±2,000 bp; peak significance = one-tailed positive Spearman $\rho < 0.01$; middle track shows diffs. Target latent uses raw RNA -> min-max -> two-state fit -> 3D KNN majority regularization. Spatial panels are independently p99-clipped and rescaled to 0-1 for shape comparison.
