

Zebrafish spatial domains used for regional enhancer analysis

Domain 0 n=2,781 Domain 1 n=5,502 Domain 2 n=5,263 Domain 3 n=2,517 Domain 4 n=2,867 Domain 5 n=3,351

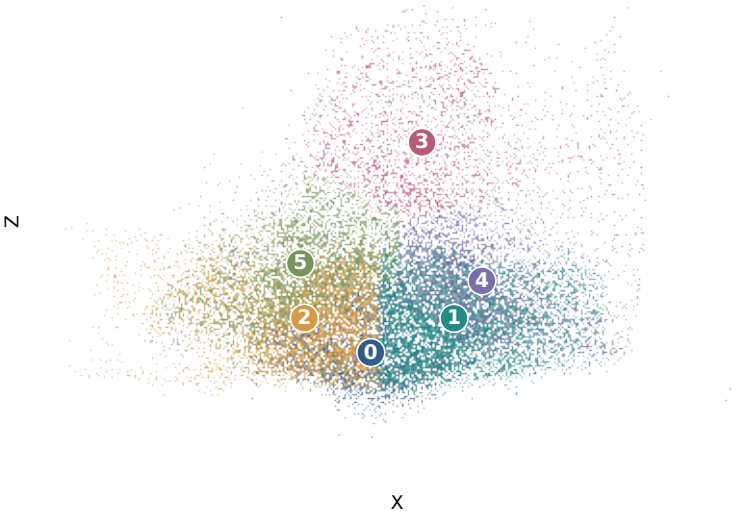

a Three-dimensional domain map

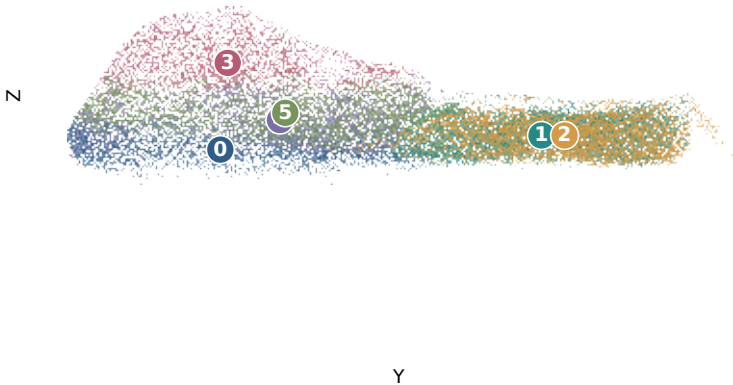

b XY projection

c XZ projection

d YZ projection

Domains: K-means (k=6, n_init=20, seed=20260814) on standardized 3D spatial_rescaled_z; 22,281 cells with finite coordinates. Labels denote computational spatial partitions, not anatomical annotations.
